### Adding Fractions

1)  $\frac{1}{3} + \frac{5}{10} =$

2)  $\frac{1}{3} + \frac{1}{2} =$

3)  $\frac{5}{10} + \frac{2}{4} =$

4)  $\frac{1}{3} + \frac{2}{10} =$

5)  $\frac{1}{2} + \frac{2}{4} =$

6)  $\frac{1}{2} + \frac{2}{3} =$

7)  $\frac{1}{3} + \frac{1}{2} =$

8)  $\frac{4}{10} + \frac{1}{5} =$

9)  $\frac{1}{10} + \frac{2}{5} =$

10)  $\frac{2}{5} + \frac{2}{4} =$

### Adding Fractions

$$1) \quad \frac{1}{3} + \frac{5}{10} = \frac{10}{30} + \frac{15}{30} = \frac{25}{30} = \frac{5}{6}$$

$$2) \quad \frac{1}{3} + \frac{1}{2} = \frac{2}{6} + \frac{3}{6} = \frac{5}{6}$$

$$3) \quad \frac{5}{10} + \frac{2}{4} = \frac{10}{20} + \frac{10}{20} = \frac{20}{20} = 1$$

$$4) \quad \frac{1}{3} + \frac{2}{10} = \frac{10}{30} + \frac{6}{30} = \frac{16}{30} = \frac{8}{15}$$

$$5) \quad \frac{1}{2} + \frac{2}{4} = \frac{2}{4} + \frac{2}{4} = \frac{4}{4} = 1$$

$$6) \quad \frac{1}{2} + \frac{2}{3} = \frac{3}{6} + \frac{4}{6} = \frac{7}{6} = 1\frac{1}{6}$$

$$7) \quad \frac{1}{3} + \frac{1}{2} = \frac{2}{6} + \frac{3}{6} = \frac{5}{6}$$

$$8) \quad \frac{4}{10} + \frac{1}{5} = \frac{4}{10} + \frac{2}{10} = \frac{6}{10} = \frac{3}{5}$$

$$9) \quad \frac{1}{10} + \frac{2}{5} = \frac{1}{10} + \frac{4}{10} = \frac{5}{10} = \frac{1}{2}$$

$$10) \quad \frac{2}{5} + \frac{2}{4} = \frac{8}{20} + \frac{10}{20} = \frac{18}{20} = \frac{9}{10}$$
